

# Steps to Recovering Your Password:

1. Click the Login button on your site.
2. Click the "Forgotten Your Password?" link near the bottom of that form.
3. Type in your email address and hit [Send Password].

The system will then email your password to your email address.

If it doesn't have your email address as one of the registered users, you will get "Sorry, no corresponding user was found". This means that, either you used a different email address, or you don't have an account on the system.
